

## License Agreement for the program FFLD

A tool for the docking of flexible ligands

### FFLD (Fast Flexible Ligand Docking)

developed by N. Majeux, N. Budin and A. Caffisch, with additional development by P. Kolb, M. Cecchini, D. Huang and F. Dey, Department of Biochemistry of the University of Zürich, (the "authors") is supplied in \_\_\_\_\_ (month/year) to \_\_\_\_\_ (name/institution/full address).

The recipient has the non-exclusive and non-transferable right to use the software FFLD within \_\_\_\_\_ (institution/full address). The recipient agrees not to disclose in any form either the delivered program FFLD or any modifications or derivative works based on FFLD to any third parties.

The recipient agrees that it will use the FFLD program solely for internal, non-commercial purposes. The term "non-commercial", as used in this Agreement, means academic or other not-for-profit scholarly research which (a) is not undertaken for profit, or (b) is not intended to produce works, services, or data for commercial use, or (c) is neither conducted, nor funded, by a person or an entity engaged in the commercial use, application or exploitation of works similar to FFLD, unless such funding confers no commercial rights to the funding person or entity.

The recipient agrees that any reports or publication of results obtained with the FFLD program will acknowledge its use by an appropriate citation. Until further notice this would refer to the FFLD program and to the paper by N. Budin et al., Fragment-based flexible ligand docking by evolutionary optimization, *Biological Chemistry* **382**, 1365, 2001.

The authors of FFLD or the University of Zurich make no warranties, either expressed or implied, as to the fitness of the program for any particular purpose, nor shall they be liable for any direct, indirect, or other damage resulting from use of the program. No particular support, service or update of the FFLD program is implied as part of the agreement. However technical contacts and advice are granted on a voluntary, friendly basis.

Sincerely yours,

Amedeo Caffisch

Recipient agrees with these terms:
